

1/2" CCD Chip - Sony XC-555

1/4" CCD Chip - Luxxor

1/2" CCD Chip - Sony XC-555

HBF & HFB2 Flexible Borescopes

The flexible boscopes should only be used with the XC-25 coupler and Sony XC-555 (or other 1/2" chip cameras). If used with smaller camera chips, the fiber pixels are magnified too much for pleasant viewing.

Rules of Thumb

1. Use VC-35 with Sony XC-555 camera (1/2" CCD)
2. Use VC-25 with Luxxor camera (1/4" CCD)

exceptions:

- a. HBR 5.4mm and 8.0mm ==> Use Sony XC-555 with VC-25
- b. HBF & HFB2 flexibles ==> Use Sony XC-555 with VC-25
- c. Very High Magnification requirements ==> use VC-75 with narrowest FOV scope which meets customer's diameter and length constraints.
