

E-Series Video Borescopes

The E-Series Video Borescope features diameters of 2.0 and 2.8mm. The new small diameters allow our customers to transition from fiber-based solutions to modern-day video technology. The E-Series Video Borescopes offer 4-way joystick articulation, image and video capture, and 4-hour battery life combined with a compact and durable design. The Hawkeye E-Series design allows end-users to easily remove and replace the insertion tube, eliminating repair downtime.
